Abstract (en)  
A hydrotherapy nozzle 10 comprises a main body 12 and jet outlet, and a chamber 14 therein in which water and air may be mixed. A water inlet 16 and outlet 18 are provided together with a threaded portion 26 for co-operating with a correspondingly threaded member 28, 29 for clamping the nozzle to the bath wall. There is a recess 30 about the threaded portion 26 and a bore 32 connecting the recess with a back of a nozzle. The bore may be used to inject sealant into the recess and effect a watertight seal with a minimum of mess and manual handling.
