Abstract (en)
[origin: EP0235008A2] This cabin comprises a paving slab (1), partitions forming walls (2), a roof (3), a door, a seat (5) and a technical partition (6) defining a technical section and a section intended for the users. This cabin is characterised in that the seat consists of a squatting seat (5) combined with a flap-type seat (9) fixed to the said technical partition (6), at a certain height above the squatting seat, and mounted so as to be manually movable between an active position in which the said flap-seat (9) extends approximately horizontally above the squatting seat and a retracted position. Advantageously, means are provided for holding the said flap-type seat (9) in the active and retracted positions. <IMAGE>
