Abstract (en)
[origin: WO8701518A1] Electrical connector assembly having a plurality of terminals (50) secured therein which cooperates with individual wires (4) to electrically terminate the wires (4) to the terminals (50). Connecting portions (54) and projections (53) of the terminals (50) are aligned in wire receiving cavities to ensure that the wires (4) are properly terminated to the connecting portions (54). The projections (53) cooperate with the wires (4) and the terminals (50) to prevent the terminals (50) from torsional forces during the termination process.
