Abstract (en)
[origin: GB2183455A] A shelving or like system has upright members (10) with upper and lower notches (11, 12) in rear faces (13) to engage heads (26) with necks (27) on wall plates (24) with fixing holes (25). Support arms (16) for a shelf have pegs (19) for selective engagement with holes (14) in one side (15) of each upright member (10), and brackets (20, 22) for abutting the front faces (21) and other side faces (23) of the upright members (10), to support the support arms in cantilever and prevent unintentional disengagement of the pegs (19) from the holes (14). <IMAGE>
