Abstract (en)
[origin: EP0235652A2] A light fitting with a rod-shaped light source (1) which, in particular, is horizontally arranged, with concavely curved side reflectors (2, 3) extending at the two longitudinal sides of the light source (1) from below to above this light source, with a screening reflector (17) arranged below the light source (1), and with two end reflectors connecting the side reflectors (2, 3) at the end faces, the screening reflector (17) consisting of a strip-like flat material and extending at a short distance below the light source (1) in parallel with the latter between the end reflectors, the width of the screening reflector (17) being \geq the width of the vertical projection of the light source (1) and the screening reflector (17) exhibiting a multiplicity of light outlet openings (18) in its area. <IMAGE>
