Abstract (en)

[origin: US4712984A] Process for pumping fluid composed of a liquid phase and of a gaseous phase, which involves conveying liquid under pressure to the inlet of the turbine of a turbo-machine comprising a pump and a turbine, mixing some of the liquid coming from the turbine with the fluid, and sucking the mixture through the inlet of the pump so as to reduce the gas content of the fluid and allow it to be conveyed by the pump.

Abstract (fr)

Installation comprenant une source (1), la sortie de la turbine débouchant dans un conduit mettant la source (1) en communication avec la pompe (7).
