Abstract (en)

[origin: EP0236648A1] 1. Detachable separating element intended to be fitted within a wire basket or carrier (1) comprising two superposed wires (4a, 7) on its sides which are intended to receive the ends of this separating element, characterized in that it comprises at each end a vertical arm (9) or a substantially vertical arm of resilient material provided at its foot with a fixing lug (10) which is elbowed outwards at right angles and the vertical branch (11) of which is intended to be placed against the internal face of the upper wire (4a) of the corresponding side whilst its horizontal branch (12) is engaged between the two superposed wires (4a and 7) of the same side.
