Abstract (en)  
[origin: EP0236877A2] Abrasive bodies bonded by a synthetic resin are sealed or coated with a water-repellent synthetic resin in the area of the bore (1) and in the area of the recess (2) at the end faces (3). At the same time, the recess (2) is rounded off with a radius (4) which corresponds to 0.027 to 0.2 times the bore diameter. The coating is sealed by means of an epoxy resin. <IMAGE>
