Abstract (en)

[origin: EP0237424A1] This appliance comprises, in the direction of movement, a milling rotor (10) disposed in a tearing-up chamber (11) for attacking the roadway to be treated and a variable-speed mixer rotor (14) with a shaft (28) which is longitudinal relative to the direction of movement (A) and mounted downstream of the milling rotor (10), this mixer rotor (14) comprising mixing arms (29) equipped, at their end, with interchangeable blades (34) and forming a screw capable of discharging the aggregates originating from the milling rotor (10), whilst at the same time mixing them, towards the rear of the device. <IMAGE>
