Abstract (en)

The fibrous material consists essentially of a mixture of low-modulus aramid fibres and of high-modulus aramid fibres, with a high-modulus aramid fibre content of between 20 and 25% of the total weight of the mixture. A proportion of the low-modulus aramid fibres is optionally replaced with fire-resistant viscose fibres. Application of this fibrous material to the production of clothing for protection against heat attack.

Abstract (fr)

Cette matière fibreuse est essentiellement constituée d'un mélange de fibres d'aramide bas module et de fibres d'aramide haut module, avec une teneur en fibres aramide haut module se situant entre 20 et 25% du poids total du mélange. Une partie des fibres aramide bas module est éventuellement remplacée par des fibres de viscoce non feu. Application de cette matière fibreuse à la réalisation de vêtements de protection contre les agressions thermiques.
