Abstract (en)
[origin: US4817960A] A projectile backstop assembly for decelerating projectiles is disclosed as including a container filled with a liquid for decelerating a projectile, an inlet opening in said container, an elongated sheet of material sealing the inlet opening and a pressure applying frame for pressing the material against the inlet opening, and an advancing mechanism for advancing the elongated sheet of material and thereby replace the pierced part of the sheet with an adjacent unpierced part.
