Abstract (en)
[origin: EP0238071A2] The package has a bottom, two longitudinal side walls (13), two end side walls (2, 4) and a top closure, a peripheral tear-off strip (17) being arranged in the side walls (1-4) for dividing the package into a bottom and a top package part, and a rear wall flap (13) bearing on one of the walls of the package, which flap is bonded to the bottom wall part and is extended upwards to the upper wall part via the tear-off strip (17). Provided in the bottom spaced apart and parallel to one another are several contact tabs (15) which are pressed out of the plane of the bottom into a position approximately parallel to the rear wall flap. These prevent the articles from slipping. <IMAGE>
