Abstract (en)
[origin: EP0238279A2] The mounting for attaching a cladding board (11) has a hollow box members having, on one side, an open channel portion and, on the opposite side. Elongated flanges (3) extend outwardly from the hollow box member. The elongate flanges extend parallel to the base of the channel portion. The mounting can be attached via the open channel portions to respective brackets attached to the wall (17). The mountings can be attached via the open channel sections to respective brackets attached to the wall.
