Abstract (en)
[origin: WO8702058A1] Recombinant DNA molecules comprising a sequence encoding a pseudorabies virus (PRV) glycoprotein selected from the group consisting of gI, gp50, and gp63, host cells transformed by said recombinant DNA molecule sequences, the gI, gp50 and gp63 polypeptides. The present invention also provides subunit vaccines for PRV, methods for protecting animals against PRV infection and methods for distinguishing between infected and vaccinated animals.

Abstract (fr)
Molécule d'ADN recombinant comportant une séquence encodant une glycoprotéine du virus pseudorabique (PRV) sélectionnée parmi le groupe constitué de gI, gp50, et gp63, des cellules hôtes transformées par lesdites séquences de molécules d'ADN recombinant, et les polypeptides gI, gp50 et gp63. Sont également décrits des vaccins de sous-unités pour le PRV, des procédés pour protéger les animaux du PRV et des procédés pour faire la distinction entre des animaux infectés et vaccinés.
