Abstract (en)
1. Controllable missile (FK) including control elements (4, 23, 33, 34, 44, 44', R1, 71, 91, 101) to influence the flight path of the missile, with a rotor which rotates relative to the remaining missile body, and a console (A) on which are arranged the control elements which are adjustable so as to influence the flight path of the missile with the aid of a control member (C, 45, 46, K, 92, 104), characterised in that the rotor has its propelling rotary drive (4, 22, 23, 44, R1, 71, 01, 101), that a further control member (E) to influence the rotation of the rotor is provided between the rotor and the remaining missile body, and that said further control member (E) includes means which actuate the control member (C, 45, 46, K, 92, 104) for the control elements on the console.
