Abstract (en)
[origin: US4732546A] An adjusting device for a fuel injection pump having a plug connection for connection with a control unit. In order to attain sealing off of the plug connection in the vicinity of its passageway through a cap of the housing, the plug connection is connected to a substrate secured in the housing, which substrate has a bushing-like extension passing sealingly through an opening in the cap, and contact pins and conductors are embedded in the substrate.
