Abstract (en)
[origin: EP0238944A2] The mounting apparatus is used for lifting the armature 13, wound onto a shaft 14, of a rolling gate plus drive and shaft bearing, on two wall brackets 5 mounted on both sides of the rolling gate opening. In this arrangement, one mounting part II, which is to be detachably fixed to each wall bracket 5, is provided in each case which protrudes directed away from the wall 7 over the wall bracket 5 and is provided at least in this area with a guide device 31 for the cable 15 of a lifting mechanism.
