Abstract (en)

A package consists of an end panel (32) hinged to opposed ends of a top panel (12) and flanking the end walls of a container. A web panel structure is pronded at each of the opposite ends of the end panel. The web panels structure consists of an end web panel (44) hinged to the end panel and a part secured in face contacting relationship with the adjacent side panels. The end panel flanks the end wall of the container (C).
