Abstract (en)  
[origin: EP0240653A2] The hairbrush has a fan and a hand-piece, having an electric damper register, and a hollow cylinder which is fitted onto the hand-piece and is sealed at the free end and has rows of pins applied to the outside of said hollow cylinder and outgoing air openings for the fan air constructed between the pins or rows of pins. In order to achieve an even emergence of outgoing air along the entire hollow cylinder (7), a swirl body (11) for the outgoing fan air is provided between the outgoing air openings (9) in the hand-piece (1) and/or the hollow cylinder (7). <IMAGE>
