Abstract (en)
[origin: EP0241727A2] The spacer, produced using cement-bound material, for reinforcements of concrete building components, has a holding element for fastening the spacer to the reinforcement. In this spacer, the holding element (5a) is formed by an elongated plastic element, there being fastened to a common longitudinal side of the holding element (5a) at least two blocks (6a) of cement-bound material which project away from this longitudinal side. <IMAGE>
