Abstract (en)

[origin: US4753166A] For smoothing an ink film on an ink application roller, so that the ink film on the application roller which is also applied to the plate cylinder will be free from valleys, ridges, striations and the like, a plate-like stamp element (11) is engaged against the circumference of an ink application roller (9), preferably the last one in the direction of rotation of the plate cylinder (10). Preferably, the plate-like stamp element oscillates or reciprocates axially, and is engaged on the surface of the ink application roller (19) by an adjustable spring force (17, 18).

Abstract (de)

Ein Farbwerk für Rotationsflachdruckmaschinen weist zur Vergleichmäßigung des Farbreliiefs auf einer Auftragwalze (9) einen tangential an diese Walze (9) andrückbaren Stempel (11) auf, der über deren gesamte Länge durchläuft und eine ebene Anlagefläche aufweist.
