Abstract (en)
[origin: EP0242755A2] The invention relates to a pneumatic vehicle tyre having a tread rubber, the two edge sections of the tread rubber consisting of rubber mixtures which are different from the section located therebetween. In order to provide a tyre which is suitable for winter use and is also suitable for high speeds, according to the invention the section situated in the centre of the tread rubber is arranged on a connecting web of the two edge sections of the tread rubber, the section arranged in the centre consisting of natural rubber and the two edge sections and the aforesaid connecting web consisting of synthetic rubber.
