Abstract (en)  
[origin: EP0243746A1] 1. A device for ensuring the supply to a cold-user with fluid liquid gas in which the liquid gas is fed to a user from a supply container via a liquid gas pipe-line (1) with a series-connected liquid gas valve (5), wherein in the liquid gas pipe-line (1) a withdrawal station (7) for vaporized liquid gas is provided with a controllable release valve (4) which is switched by means of a temperature sensor (2) and a control unit (3) connected thereto, characterised in that the temperature sensor (2) is arranged in the liquid gas pipe-line (1) and the withdrawal station (7) for vaporized liquid gas is arranged between the temperature sensor (2) and the liquid gas valve (5) of the user.
