Abstract (en)

[origin: EP0243767A2] The hollow rail, which can be inserted in furniture, walls or the like, has a hole pattern for hooking in fittings, the width of the slot which is open towards the outside being constructed only as a very narrow gap, the slot being bounded on both sides by the material of the furniture or wall part, the fitting being constructed as a plate-shaped retaining element, and the slot width corresponding to the thickness of the fitting.
