Abstract (en)

An attachment for an armoured vehicle comprises a dozer-like blade (6) with an earth-moving front surface (8) and a flat, substantially rearwardly extending lower stabiliser surface (10). The blade (6) is attached to the vehicle by an adjustable linkage (14) capable of locating the blade (6) in any one of the following positions: a first, earth-moving position with the lower edge of the front surface (8) of the blade (6) just below ground level; a second, anchorage position with a more substantial proportion of the lower regions of the blade (6) below ground level; a third, stabilising position with the stabiliser surface (10) of the blade (6) contacting the ground.
