Abstract (en)

[origin: EP0244900A2] A detergent drawer structure for use on washing machines, in particular domestic washing machines, comprising a box casing (2) provided with a base aperture (7') for discharge into the washing machine tub, an element (5) slidable in said box casing and divided into compartments (6a,b,c,d) for receiving detergents and means for feeding water into said compartments. The means for feeding water to the compartments are conduits (21, 27, 112, 200) which are supported by the roof (3, 103) of the box casing to which they are joined by coupling means, and constitute parts which are independent of said roof.
