Abstract (en)
[origin: WO8702677A1] By using high performance liquid chromatography and isoelectric focusing, four different biologically active isoforms of soluble immune response suppressor (SIRS) protein (SIRS- alpha 5, SIRS- alpha 6, SIRS- alpha 7 and SIRS- beta 7) have been isolated. All these isoforms have nearly identical m.w. when subjected to molecular sieve chromatography and migrate with a m.w. of about 11,000.
