Abstract (en)  
[origin: EP0246368A1] A chaff dispenser, primarily a cartridge, has a chaff payload (12) disposed within an elongate tubular primary retainer (11). The primary retainer (11) is closed at one end by an end cap (16) and has a pyrotechnic charge (17) sealed at the other end. Disposed between the charge (17) and the chaff payload (12) is a piston (19) operative to eject the chaff payload (12) from the primary retainer (11) upon actuation of the pyrotechnic charge (17). the chaff payload (12) is contained in one or more secondary retainers (13) which is/are ejected with the chaff to prolong the radar response period of the chaff and to reduce aircraft contamination.
