Abstract (en)
[origin: EP0246490A2] The distributing head (2), having a distribution plane (5) adjoining its product outlet for a distribution product (4) coming from a connected container (1), can fulfil both the function of a container closure and of a distributing device if an outlet valve (6), which can be opened counter to the effect of an elastic restoring means (13) and has a product outlet opening (3) located directly in the distribution plane (5), is provided in the product outlet (Figure 2). <IMAGE>
