Abstract (en)
[origin: WO8702921A1] Apparatus and process for internal surface modification of a pipe bend or elbow (herein referred to as a bend), wherein a bend (20) is positioned on mounting means (16) of a support frame (14) rotatable about a principal axis (X). The bend (20) is positioned such that it has a radial section thereof positioned substantially in a work plane perpendicular to axis (X) and such that the section is substantially centered on axis (X) during rotation of the frame (14) about axis (X). A treatment head (22) is positioned at the work plane, adjacent axis (X), and operated to effect modification of an annular zone of the internal surface of the bend (20), around radial section, as the frame (14) and the bend (20) mounted thereon is rotated under the action of drive means (12) to move the zone across the treatment head (22).

Abstract (fr)
Appareil et procédé destiné à modifier la surface interne d'un coude (20) de tuyaux ledit coude étant placé sur des organes de montage (16) d'un cadre de soutien (14) tournant autour d'un axe principal (X). Ledit coude (20) est placé de telle sorte à présenter une section radiale positionnée实质上在工作平面（垂直于轴X）且该部分位于轴X的中心。当框架（14）绕轴（X）旋转时，该部分保持在工作平面。一个治疗头（22）位于工作平面，靠近轴（X），并操作以修改弯头（20）内部表面的环形区域，该区域围绕着该部分，同时框架（14）和弯头（20）安装在其上的部分在驱动装置（12）的作用下旋转以移动该区域通过治疗头（22）。
