Abstract (en)
[origin: WO8703373A1] A process for testing for AIDS virus in a liquid sample, which comprises applying the sample on to a zone of a filter material, the zone having antibody to AIDS-causing virus immobilised therein, and allowing the liquid to pass through the filter material and to be taken up by absorbent material in contact therewith.

Abstract (fr)
Un procédé permettant d'analyser le virus du SIDA dans un échantillon liquide consiste à appliquer ledit échantillon sur une zone d'un matériau de filtrage, un anticorps au virus causant le SIDA étant immobilisé dans ladite zone, et à laisser le liquide passer à travers le matériau de filtrage et à permettre son absorption par du matériau absorbant en contact avec le matériau de filtrage.
