Abstract (en)
1. Method for the skin-contact-free metering of dishwashing machine cleaning tablets in the shape of pressed powder pellets (10) formed in large format with the use of a tweezers-like gripping aid (1) with straight limbs (5) consisting integrally of elastic material and gripper surfaces (7) with straight gripper edges (3) extending transversely to the longitudinal direction (11) of the limbs, characterised thereby, that a gripping aid (1) is used, which is provided with gripper surfaces (7) bent resiliently at a damping angle (6) out of the longitudinal direction (11) of the limbs in direction each towards the other and which on compression itself yields to the pressure force initially in the region of the damping angle (6) before the pressed powder pellet (10) can be affected detrimentally at substantially higher pressure.

Abstract (de)
Eine pinzettenartige Greifhilfe (1) mit elastischen, geraden Schenkeln (5), die an ihren Greiferflächen (7) quer zur Schenkellängsrichtung (11) verlaufende gerade Greiferkanten (3) besitzt, erhält eine eine von aussen ausgeübte Druckkraft ausgleichende Federwirkung, wenn die Greiferflächen (7) in Richtung auf einander zu aus der Schenkellängsrichtung (11) federnd abgewinkelt sind.
