Abstract (en)

[origin: EP0248278A2] The dispenser has a housing tube (1) which has at one end a discharge opening (3') and, opposite the latter, is fitted with a pressure bottom (2) for transporting in the direction of the discharge opening the product (4) which is to be discharged and is contained in a bag (5). To achieve a construction which is simple in terms of manufacture and advantageous in use, it is proposed to provide an actuating grip (B) outside the housing tube (1) for displacing the pressure bottom (2). <IMAGE>
