Abstract (en)
[origin: EP0248285A1] In the production of electrical heating elements with PTC elements, it is intended to improve the achievable thermal power. This is achieved by the PTC elements being provided with heat dissipating elements (10, 10') which are shaped such that the heat emitting surface (11) of the PTC elements is arranged at right angles to the heat emitting surface (12) of the heat dissipating elements. <IMAGE>
