Abstract (en)

A method of dispensing a curable substance comprising a base material and a hardener therefor, which method comprises the steps of: providing a flow of base material under pressure at a controllable flow rate from a reservoir thereof, providing a flow of hardener under pressure at a controllable flow rate from a reservoir thereof, combining said flows into a flow of base material/hardener mix through a delivery line, and applying a peristaltic pumping action to the delivery line along a flexible portion thereof.
