Abstract (en)
[origin: EP0250808A2] 1. A door lock, especially for motor vehicles, having a lock cylinder connection lever (4) and an additionally blockable securing lever (6) for the locking and unlocking of the door lock, where the connection lever (4) actuates the securing lever (6) with a transmission lever (8), characterised in that the transmission lever (8), when the door lock is in the locked position, sets an external actuation lever (5) and an internal door handle (actuating rod 10) out of action, and in that the transmission lever (8) is uncouplable from the securing lever (6).
