Abstract (en)
[origin: EP0250885A2] The device is for a vehicle lifting platform having running rails or for a drive-over pit, such a device being arranged on each running rail. The lifting device is designed as a separate, retrofittable add-on lifting platform (3), which comprises a folding frame (11) with air bellows (12), the bearing plate (5) and the baseplate (4) of the folding frame (11) at the same time being the closure plates for the air bellows (12). <IMAGE>
