Abstract (en)  
[origin: US4749906A] The invention relates to multiple beam lasertrons. The n (n: integer greater than 1) electron beams of the lasertron are obtained from the same laser beam from which n secondary laser beams are extracted, by occultation, which are deflected respectively towards the n photocathodes of the lasertron.

Abstract (fr)  
L'invention concerne les lasertrons à faisceaux multiples. Les n (n : nombre entier supérieur à 1), faisceaux d'électrons (3) du lasertron sont obtenus à partir d'un même faisceau laser (2) dont, par occultation, sont extraits n faisceaux lasers secondaires qui sont déviés respectivement vers les n photocathodes (1) du lasertron.
