Abstract (en)

[origin: EP0251962A1] 1. Protective and/or decorative device (1) for openings (2) in walls, windows or the like, used in particular for protection from light, from insects, to protect one's privacy, or for aesthetic reasons, comprising at least : - a foldable or raisable screen (3), constituted by at least two retractable curtains (5, 6), having different functions, placed one after the other, - means (4) for folding up or raising the screen (3) for each of the curtains, constituted by first means (11) for raising the first curtain (5) and second means (12) for raising the second curtain (6), characterized by the fact that the said curtains (5, 6) are each controlled separately and/or simultaneously by means of a common operating device (7) having at least two control systems (20, 21) : - the first A (20) acting on the said first means (11) for folding up or raising the said first curtain (5), - the second B (21) acting on the said second means (12) for folding up or raising the second curtain (6), - the said first (20) and second (21) control systems being independent of one another but nonetheless suitable for being combined to permit control of the folding up or raising the two curtains (5, 6) simultaneously in a single operation.
