Abstract (en)
[origin: EP0252218A1] A known extension cable for an antenna cable carries a plug at one end and a socket at the other end, so that its plug can be connected, for example, to the socket of the antenna cable. To reduce the production cost, the extension cable (15) according to the invention carries a coaxial mother plug (14) at least at the end to be connected to the antenna cable (10), in the same way as the antenna cable. A coaxial adapter (13) is used for connecting the mother plug (14) of the extension cable to the mother plug (12) of the antenna cable. (Figs. 1 to 3). <IMAGE>
