Abstract (en)
[origin: US4813700A] A screw attachment mechanism of a ski binding which is adapted to be mounted on a ski. The attachment mechanism includes a forward base plate having at least two base plate bores extending therethrough and guide rails mounted on the base plate. A pedestal frame is mounted on the guide rails and includes at least two bores aligned with the base plate bores. Screws are individually disposed within each of the aligned bores and an engagement mechanism is provided for securely retaining the screws within corresponding base plate and pedestal bores.
