Abstract (en)  
[origin: EP0254828A1] In this device a transmission link (2) accepts from the transmitter (1) of the apparatus wattlessly emitted, serial digital signals in electrical isolation by means of a transformer (8) and a coupled LC oscillator (9) and sends the signals via a line (3) to a receiver (4). The signals processed in the receiver (4) determine information displayed in a display (10). The transmission link (2) is fed from the receiver (4) via the line (3).
