Abstract (en)

[origin: EP0255103A2] A combination apparatus for the mechanical preparation of organic materials such as, for example, branch wood, bushes, shrubs or other materials principally for the purpose of subsequent composting and production of fine compost soil consists of a chopper (5, 6) having a charging revolving crane (16) and a separately allocated compost conversion apparatus (20). All parts of the apparatus can be put onto a common basic frame (1) provided with running wheels (23) and/or a towing or trailer shaft (31). <IMAGE>
