Abstract (en)

[origin: EP0255455A1] 1. Package permitting the vertical display of various products, such as textile articles in the form of a panel, of the type consisting of a transparent shell, having at its top part a hook serving to suspend it, the said shell consisting of two identical half-shells (1a, 1b), secured over their perimeter (2a, 2b), the volume contained between the two half-shells corresponding to the volume of the folded article (8) to be displayed, characterized in that the said shells (1a, 1b) enclose between them a support plate (6) which extends over the entire width of the said package and which has, parallel to its top edge adjoining the package-holding hook, at least one slot (7) permitting the passage of the folded article to be displaced, the shell being open at its bottom art.
