Abstract (en)

[origin: WO8801071A1] The clockwork has a plate (1), a train wheel bridge (2), a center moving unit (14), a wheel for the hours (24) and a battery (25). The center driving gear (14) comprises a shaft (15) and a wheel (19) friction-mounted the shaft (15). Across the width of the clockwork, the wheel (19) is adjacent on one side to the battery (25) and on the other side to the barrel wheel (24). In this clockwork, the center driving gear (14) and the barrel wheel (24) may be set in place at the very end of the assembly operation.
