Abstract (en)
[origin: EP0255863A2] In the method, in individual washing runs of a multiple-run overall washing operation, the degree of soiling of the washing liquid is determined and the washing liquid is influenced depending on said degree of soiling. In order to reduce the water and energy requirement and the duration of the programme, when a low degree of soiling has been determined at least one of the complete washing liquid exchanges or partial washing liquid exchanges following in the overall washing programme is excluded. <IMAGE>
