Abstract (en)
[origin: EP0256830A2] Apparatus 1 for holding a tool (not shown) of a rotary work-piece (that is one which rotates during the forming operation, though it could also rotate in use) comprising an elongate member 2 on which the tool is mountable and which member has a plurality of support surfaces 3 and 4, and means 5 to engage and urge the tool bodily against the support surfaces 3 and whereby to clamp the tool in an operative position.
