Abstract (en)

[origin: EP0257106A1] Method and apparatus for making thin-walled articles from bonded fibres which are dry or contain only a small amount of moisture, such as fibres produced from lignocellulose-containing particles. The fibres are blown into a closed space (4) which is provided, at the end faces, with at least one blowing-in opening (5) and at least one suction opening (7). <IMAGE>
