Abstract (en)

The invention relates to a small size, high yield plant for the quality processing of woollen or synthetic fibres originating in particular from waste fabric, said plant being formed of fixed rod cards and/or flat cards. The plant consists of a carding equipment comprising, in succession, a loader (5), a preparation card (1) with carding units of the type with fixed rods and workers, possibly a cleaner unit (7), an intermediate webbing device (6), a finisher card (8) of the type with fixed rod carding units, and a final unit preferably consisting of a dividing unit (11).
