Abstract (en)
[origin: DE3606312A1] Nematic liquid crystal phases with at least two liquid crystal components, of which at least one is a chiral compound, characterized by the fact that the chiral compound contains no more than one chiral centre, the chiral centre is a component part of a bridge with an even number of bridge elements between two cyclic mesogenic residues.

Abstract (fr)
Phases de cristaux liquides nématiques comportant au moins deux constituants de cristaux liquides, dont au moins un est un composé chiral, caractérisées en ce que le composé chiral ne contient pas plus d'un seul centre chiral, le centre chiral étant un élément constituant d'un pont avec un nombre égal d'éléments de pont entre deux résidus mésogènes cycliques.
